ORIGIN /

It all started in yet another spectacular event of Salone del Mobile 2018. When an event of such a scale, with a vision to bring in new and out of the world, is in the event's rule book, there had to be something new to the décor business of walls and windows.

This is where world class brand **Inkiostro Bianco**, in association with **Nerodiseppia** and **Studio Zero Design Studios** came together with 14 cutting edge graphic designs and gave it an identity; **Textile Project 2018**. **AAREN Intpro** Gallery, with an eye for Avant garde designs, is a proud partner of the newest range in Inkiostro Bianco and is delighted to bring enticing designs of the world to the Indian audience.

/ MAKE ROOM FOR SOME ELEGANT SWAY!

Gorgeous Georgettes

If Tela, the taffeta fabric could be used for a scenic wall design, how could the Georgettes and the Buio be left behind. And if a wall could be decked up, how could the windows and curtains not be dressed to kill! This is where thin and transparent, classy and refined, printed Georgette saw its day to transform the atmosphere albeit scenic curtains infusing a unique and changeable aesthetic taste at the same time. If Taffeta fabric could induce a top notch style, it is now taken notches above the ethereal George curtains enlivening the room to enthrall every visitor.

Bown down to Buio

Buio, the other variant is a blackout fabric which, when combined with Tela, transforms every room adding a touch of enigma and drama. Both the variants are encased in two capsule collections with 14 new total graphic designs.

FLUIDITY TAKES A DEFINED SHAPE HERE /

If ethereal and enigma were to converge it's in the Textile Collection 2018. With an emphasis to not curtail the importance of curtains, the range brings in an unmatched fluidity that sways a vibrant song singing and declaring how quintessential are the windows and curtains in the décor space.
